

## MyNT (My Network Too)

---

### MyNT - Now available for download to all Dish Customers

Being part of the family is much easier now with MyNT, an application that let you share the homeowner's Media Network such as Netflix, DishSubscription, and Internet access without having to share your personal information.

The application is easy to use and the handshake algorithms that allow you to get access to the home network will automatically disconnect, when not in range of the home network.

(NASDAQ: DISH) — DishNetwork is helping their customers maintain the family together by allowing its customers to share their Media Network with family and friends while staying at the house. The MyNT application will help DishNetwork customers share their Media Network with family, friends, and houseguest whenever they are staying for the weekend or whenever there is a family visit.

There used to be a time where you had house guest or friends that would stay for the weekend or for a couple days and you had to share your password for your Wi-Fi Network along with the Netflix. Also, you had to share TVs in order to watch a TV program that your house guest like or you like, therefore, restricting TV time to that specific TV in the house.

With MyNT, you no longer have to share your password or have to worry about having your password floating out there in cyberspace. MyNT is a complimentary service of DishNetwork TV/Internet subscription and you can download it for free once you have an active account.

DishNetwork Customers are already noticing their guests, friends, and family are enjoying and having much fun while staying at the house over the weekend and fewer awkward moments from the guest when asking for the Wi-Fi network passwords: "I had my 2 best friends stay over the weekend and they were delighted in how MyNT works. So much that they asked me how they can get a service like that." - Linda Harper, Dish Network customer "I no longer have to worry about my Wi-Fi password getting in the wrong hands, and my friends can share a common interest in my TV/Movie habits. I really like how MyNT keeps my information secured and at the same time allows me to share my media with people that I care.

## **How do MyNT works?**

One time set up - MyNT will only ask you to store your Media Passwords once, setting up the application is easy and tech-friendly as the application will walk you through on how to manage the people you allow to have access to your Media Network. Once the set up is complete, the guest or family member will receive an invite to join the house network, when the invitation is accepted the phone will automatically be added to Guest or family member and they will immediately be able to start watching and enjoying the house network.

Download the applications for free when you open a new TV/Internet account.

DishNetwork customers can learn how to download and what technical requirement is needed in order to download the application by visiting [dish.com/mynt](http://dish.com/mynt)

## **MyNT is perfect for People who like to have friends and family visit their house and enjoy social activities within the safety of their own homes.**

MyNT, allows you to store as many media services you want Netflix, Hulu, Dish Home Subscription, and more. MyNT, also allows you to save people whom you want to keep in your network, so when they visit again they will not have to get a new invite to join your network again.

You decide whom you want to keep in your network with an easy and simple to follow application menus. Sharing has never been easier nor fun, with MyNT you will be able to enjoy more time with family and you will be able to share your TV habits with your friends and family.

"As a person who likes to have friends over the weekend, I find MyNT a fun and secure way to share Media with people that our customers care" said Mark DeSantos Former Dish Manager. "It has been a rewarding experience hearing out stories from customers stating that their families and friends enjoy the application and they find it very rewarding having the feeling of sharing something with their loved ones. MyNT is a way for our customer to share the love of TV with their friends and family and it is a way for them to express their gratitude towards that special person who will be part of their Network.

MyNT is now available to download for free to U.S. Dish customers who have a TV and Internet subscription. For more information, visit [www.dish.com/mynt](http://www.dish.com/mynt)
